

# California OES Weather Threat Briefing

Saturday, December 4, 2021  
9:00 AM PST

**Day 1 (Saturday):** High astronomical tides could cause minor coastal flooding along the coastline Friday through the weekend.

National Weather Service

*Western Region Headquarters  
Regional Operations Center  
Salt Lake City, UT*

# WEATHER KEY POINTS

12/04/21 - 12/10/21

## Friday-Thursday

- Areas of overnight and morning dense fog will continue near the southern California coast and across parts of the Central Valley and deeper northern California mountain valleys through the weekend
- High astronomical tides through the weekend could cause minor coastal flooding across flood prone beaches statewide
- Gusty offshore winds Sunday will bring elevated fire weather concerns across the foothills of southern California
- Gusty onshore winds are expected across southern California on Monday and Tuesday, especially over the mountains and deserts.
- A period of rainfall and high mountain snow is expected across primarily the higher terrain of northern California on Monday, including the Sierras
  - Precipitation is generally expected to be light to locally moderate, and there are no significant flooding concerns at the moment
- Additional precipitation with areas of gusty winds are possible across the state for mid-to-late next week
